## **Green Jubilee**

Jubilee residents will be concerned about rising gas and electricity bills and we need to reduce our carbon emissions to help deal with climate change. The council should help co-ordinate and pay for insulating homes as an urgent measure. I'd also like to see the installation of solar panels and other devices to make more use of renewable energy. This is part of the Green Party's Green New Deal that will create much needed 'green collar' jobs.

## **A Safer Jubilee**

My past experience in Further Education tells me most young people want to get on and make something of themselves. In the last couple of years however we have seen distressing levels of knife crime. There is no one easy solution but this area does need more facilities for young people and a higher police presence. We need to work to help the minority of young people who have gone off the rails respect themselves and others more. Collaboration between agencies including the education service, social services, and community and faith groups is essential. And of course decent employment prospects will help create a better future for all.

## **Greens want**

- A Borough wide 20mph speed limit on residential roads.
  - More support for community initiatives.
  - A recycling centre in the Jubilee area.
  - Cheaper public transport.

## **Elected Greens**

May 1st 2008 saw Jenny Jones and Darren Johnson re-elected as Green Party members of the London Assembly. I want to see Jean Lambert re-elected on June 4th as Green Party Member of the European Parliament for London. And of course I'd like to encourage you to join the Green Party.
